Dear Sir/Madam

**Re: Rural Addressing System**

As you may be aware, a distance-based addressing system is being implemented in the district by Mid Murray Council as directed by the State Government in conjunction with emergency services, Australia Post and other utilities.

In the process of implementation, it has come to Council's notice that in some situations, calculations used to generate addresses are inapplicable or unsuitable. The reasons for this are many fold including:-

- Some properties are too close in proximity to others;
- Some properties, particularly shacks, are not on public roads and therefore will not be issued with access points numbers; and
- Where there is a long row of dwellings, the new double-sided signage on star droppers would create less than attractive aesthetics.

Council has therefore developed a particular method of property addresses for these situations, based on the access point from the public road which will be given a rural distance-based address.

- Each property will be numbered sequentially from the access point;
- Where dwellings exist on both sides of the road, the odd numbers will be on the left, starting from the access point;
- Where dwellings exist on only one side, sequential numbering will apply; and
- Unoccupied blocks along these private roads will also be allocated numbers.

An example:

Mr & Mrs People  
House (or shack) 22  
1 Person Road  
RIVERVALE SA 5555

This system of numbering has been approved as the most effective method of tying in the new Rural Addressing System with our area's unique situation. Council will provide free of charge a high visibility numberplate-size sign. Suggestions as to how installation can be done and by whom would be appreciated.
